

Arun Prakash

ECE student · Embedded systems & IoT

Chennai | +91 98765 43210 | arun.prakash@example.com | linkedin.com/in/arun-prakash-example | github.com/arun-prakash-example

CAREER OBJECTIVE

Third-year ECE student who enjoys building embedded and IoT systems end to end, from sensor circuits to cloud dashboards. Looking for an internship where I can work on real hardware products.

EDUCATION

B.E. Electronics and Communication Engineering 2023 - 2027

ABC Institute of Technology | Anna University | CGPA: 8.4

Higher Secondary (Class 12) 2023

XYZ Higher Secondary School | State Board | Percentage: 91%

Secondary School (Class 10) 2021

XYZ Higher Secondary School | State Board | Percentage: 94%

Relevant Coursework: Digital Signal Processing, Microcontrollers, Analog Circuits, Communication Systems

TECHNICAL SKILLS

Programming: C, Embedded C, Python, MATLAB

Tools & Software: Arduino IDE, Proteus, KiCad, Git, VS Code

Domains: IoT, Embedded Systems, PCB Design, Signal Processing

Soft Skills: Teamwork, Presentation, Problem solving

PROJECTS

Smart Irrigation using IoT Jan - Apr 2025

Mini project | Role: Team lead · firmware | Team of 3

Tech: ESP32, Embedded C, Firebase, MIT App Inventor

Link: github.com/arun-prakash-example/smart-irrigation

- Farmers over-water fields because they cannot see soil moisture.
- Built an ESP32 node that reads soil moisture and temperature, switches the pump automatically, and shows live readings on a mobile dashboard.
- Cut water use by about 30% in a 2-week campus garden trial

ECG Noise Removal with Digital Filters Aug - Oct 2025

Course project | Role: Individual | Individual project

Tech: MATLAB, DSP

Link: github.com/arun-prakash-example/ecg-filters

- Designed FIR and IIR filters to remove baseline wander and 50 Hz power-line noise from ECG signals and compared their performance.
- Improved SNR by 12 dB on MIT-BIH sample records

Line-Following Robot Feb 2026

Hackathon project | Role: Hardware & tuning | Team of 4

Tech: Arduino, C, PID control

Link: youtube.com/watch?v=example

- Built a PID-controlled line follower with IR sensor array in a 24-hour hackathon.
- 2nd place out of 40 teams

INTERNSHIPS & TRAINING

Embedded Systems Intern Jun 2025 - Jul 2025

Sample Embedded Labs Pvt Ltd | Bengaluru | On-site

- Built a UART test jig to check 50+ sensor boards per day
- Wrote Python scripts to log and plot test results
- Documented the board bring-up checklist for the team

CERTIFICATIONS

- Introduction to Internet of Things - NPTEL (Nov 2025)
- Python for Everybody - Coursera (Jun 2024)

ACHIEVEMENTS

- 2nd prize, 24-hour Robotics Hackathon - National-level tech fest (Feb 2026)
- Merit scholarship - ABC Institute of Technology (2024). Awarded for top 5% CGPA in department.

PUBLICATIONS & PRESENTATIONS

- "Low-cost IoT Soil Monitoring for Small Farms", National Conference on Emerging Technologies, Paper presentation, Mar 2026

LEADERSHIP & ACTIVITIES

- Technical Secretary, IEEE Student Branch (2025 - Present): Organised 3 technical events with 200+ participants.

WORKSHOPS & SEMINARS

- Hands-on PCB Design with KiCad - IEEE Student Branch (Aug 2025)

ADDITIONAL INFORMATION

Languages: English, Tamil, Hindi
